

**City of Coos Bay
Request for Qualifications
To Provide Facility Planning and
For Wastewater Treatment Plant 1**

**REQUEST FOR INFORMATION
MARCH 14, 2017**

The City received the following requests for additional information:

1. Does the City have a list of the areas where the West Yost Facility Plan is non-compliant?

The City does not have a formal list of items for the Facility Plan. However, it has been observed that the Process Flow Diagram (Figure 4-3) was incorrect and the City has concerns about capacity issues for the preferred option. Attached is an updated process flow diagram for your use.

2. Would the City consider extending the range of experience from 5 years to 10 years?

The City will accept references, experience, and project summary/profile sheets from the last 10 years (as opposed to the original 5-year requirement). This is in reference to Item 3 under the Qualifications Package Requirements section in the RFQ.
